A full Windows operating system and Excel is required for use (note: macros used in the forms are not supported in mobile versions).

• Disclaimer: These electronic wetland determination data forms were created for WSDOT employees. WSDOT wants to share these useful tools with the understanding that they are not approved or endorsed by the Corps. They are provided "as is", with no guarantees as to accuracy, appropriateness, completeness, or legal effect for any purpose. Usage is "at your own risk". For non-WSDOT users, additional support is not provided.

• What is included: There are two Excel template files for each Corps regional supplement: one file name begins with "Field" and the other with "Office". The "Field" file is designed for field use and is optimized for tablets as small as 7 inches. The "Office" file is designed to produce report-quality electronic forms in the Corps format. The "Office" file can either be used to import data from the field forms or to transcribe data collected on paper datasheets. User notes are provided in the "Office" file.
